SMS Special Seminars

Tim Cannon "Tim The Cyborg"
Software Developer, Entrepreneur & Biohacker

Tim Cannon is an American software developer, entrepreneur, and biohacker based in Pittsburgh, Pennsylvania, USA. He founded and leads the biohacker group *Grindhouse Wetware*, and currently serves as the CEO of *Livestock Labs*, a biotechnology startup company that creates implantable technology for cattle and other animals. Cannon himself has had a variety of body modification implants, and has been referred to in the media as a cyborg. Tim has spoken on subjects including technological ethics, sensory substitution, and citizen science.
